To: Josh Palmer, P.E. Water Resource Control Engineer

From: Gregory P. Axline, Chief Plant Operator O.P.U.D.

Re: Tentative NPDES Permit, Order NO. R5-2004-0094, NPDES NO. CA0077836

Olivehurst Public Utility District has found in the Tentative NPDES Permit that there is no clause as to when and what sampling is to be taken at R-1 and R-2 when there is no flow in R-1. As is in the Present NPDES Permit with regards to sampling of R-1 and R-2 when there is no flow in R-1, it states; during periods of discharge when there is no flow at R-1, required receiving water monitoring shall be limited to dissolved oxygen monitoring at R-2. The District believes this passage is in the existing Permit so no unnecessary sampling is needed to be done. If there is no flow in R-1 then sampling of R-2 would be redundant of samples already pulled on the Plant effluent.

If there is any information that is needed that O.P.U.D. has overlooked or you have questions about the enclosed information please contact Gregory P. Axline, Chief Plant Operator. The numbers are below.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that based on my inquiry of those individuals immediately responsible for obtaining the information. I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment.
